

CONTENTS

Part 1 Algebra and functions 1

Indices	1
Surds	7
Polynomial expressions	10
Quadratic functions	13
Simultaneous equations	21
Inequalities	24
Sketching graphs	27
Graphical solution of equations	31
Transformation of curves	34
Review exercise 1	40
Examination exercise 1	45

Part 2 Coordinate geometry

Gradient, mid-point, length of a line	52
Parallel and perpendicular lines	53
The equation of a straight line	55
The intersection of two lines	59
Review exercise 2	61
Examination exercise 2	63

Part 3 Sequences and series 1

Sequences, the n th term	67
The sigma notation	71
Arithmetic series	72
Review exercise 3	80
Examination exercise 3	81

Part 4 Differentiation 1

Gradient of a curve	84
The general rule	86
Tangents and normals	93
Review exercise 4	99
Examination exercise 4	102

Part 5 Integration 1

Indefinite integration	105
Finding the equation of a curve	109
Review exercise 5	111
Examination exercise 5	113

Part 6 Algebra and functions 2

Algebraic division	115
Factor theorem	116
Remainder theorem	122
Review exercise 6	126
Examination exercise 6	127

Part 7 The circle

Equation of a circle	130
Tangents and normals	134
Review exercise 7	137
Examination exercise 7	139

Part 8 Sequences and series 2

Geometric series	141
Sum to infinity of a geometric series	145
Binomial expansion	150
Approximations and further expansions	156
Review exercise 8	158
Examination exercise 8	160

Part 9 Trigonometry

Sine and cosine rules	165
The area of a triangle	172
Trigonometric graphs	174
Solving trigonometric equations	177
Radians	186
Solving equations using radians	192
Sketching the graphs of trigonometric functions	195
Review exercise 9	199
Examination exercise 9	203

Part 10 Logarithms

Logarithm as an index	208
Laws of logarithms	208
Review exercise 10	213
Examination exercise 10	215
